

Ryoma Taguchi

AI-Driven Frontend Engineer

Yokohama, Kanagawa, Japan (Open to Remote)

Portfolio: <https://ryoma-ai-portfolio.vercel.app/>

PROFESSIONAL SUMMARY

Frontend engineer with hands-on experience building full-stack web applications using React, Next.js, and TypeScript
Specializes in integrating LLM APIs (OpenAI, Claude) into production-grade products
Ex-Accenture bilingual IT consultant with cross-border leadership across Japan, China, and Philippines
Passed all 6 stages of IBM Philippines Bilingual Developer selection conducted entirely in English

TECHNICAL SKILLS

AI / LLM: OpenAI API, Claude API, Prompt Engineering, RAG, AI Agent Design, pgvector
Frontend: Next.js, React, TypeScript, Tailwind CSS, JavaScript, HTML5, CSS3
Backend: Node.js, REST API, Supabase, PostgreSQL, Prisma ORM
Tools: Git, GitHub, Vercel, Docker, Webpack, Vite, Figma
Languages: Japanese (native), English — Professional (Accenture PH full-time; IBM 6-stage bilingual selection; 3,000+ live sessions)

WORK EXPERIENCE

Accenture Inc. | Bilingual IT Implementation Analyst (Japanese / English) Feb 2022 – Feb 2024

Led bilingual (Japanese/English) HR system migration project across Japan, China, and Philippines
Led bilingual sub-team of 5; all meetings and stakeholder comms conducted in English
Reduced onboarding period from 3 months to 1 month through documentation & process optimization
Coordinated between Japan, China, and PH IT teams to establish cross-border operational workflows
Handled English client meetings, stakeholder communications, and process documentation

Independent AI Projects | AI-Driven Frontend Engineer (Self-directed) Mar 2024 – Present

Architected and deployed full-stack React / Next.js applications end-to-end — TypeScript, Prisma ORM, Supabase, REST API design — with OpenAI and Claude API integrations
Built IoT Fleet Monitor: real-time anomaly detection dashboard (Supabase Realtime + GPT); delivered from zero to production in 1 day for a technical interview
Developed RAG-based internal helpdesk SaaS — pgvector semantic search + GPT-4 over company PDFs, full backend design and Vercel deployment
Built autonomous Sales Agent — AI-generated outreach emails + Vercel Cron scheduling, integrated with SMTP delivery
Passed IBM Philippines Bilingual Application Developer selection — all 6 stages conducted entirely in English

EDUCATION

Meiji Gakuin University Apr 2012 – Mar 2018

Bachelor of Law

Study Abroad — Denmark & Philippines

2017 | English-immersive environment, international cross-cultural experience

CERTIFICATIONS & ACHIEVEMENTS

IBM Philippines Bilingual App Developer (Frontend) — passed all 6 selection stages in English (Sep 2025)
The Odin Project — Frontend & Backend tracks (Dec 2024) | theodinproject.com
English: 3,000+ live conversation sessions (~90,000 min) — full-time operations at Accenture Philippines
